

HT4 TOPIC: Y8 Development (Globalisation & Urban Focus)

What are we learning about?

We will develop our knowledge on development further by looking at slums in LIC/NEE urban areas focusing in on Kibera in Kenya before looking at what globalisation is and whether or not it is a positive or negative thing.

Why are we learning about it?

Many of the products that we use every day are made by people in LICs and NEEs so it is important to understand the consequences of this so we can make better choices as consumers. This also links with the industry topic in HT5 and 6 as well as the GCSE course.

What new KNOWLEDGE will I gain?

You will be learning about what it's like in the slums of Kenya and why the people are forced to live in these areas and how we are contributing to that situation.

How does this build on the SKILLS I already have?

You will be building on skills of suggesting problems and benefits of different activities and situations to grow them into full evaluation answers.

What new SKILLS will I develop?

You will start to use skills such as evaluation when evaluating if solutions to slum problems are effective or not and if globalisation is a positive or negative for different groups of people.

How does this build on the KNOWLEDGE I already have?

We will be building on the knowledge of development indicators and development's impact on population and applying it to new areas. It will build on our knowledge of population from Y7 as well.
