

TOPIC: RO18 LO1 – Understand reproduction and the roles and responsibilities of parenthood.

What are we learning about?

We will learn about the responsibilities of parents, including how to prepare for a maintain a healthy pregnancy. we will learn how a baby is conceived and how to avoid unwanted pregnancy.

Why are we learning about it?

This unit will be examined in the final exam. In a vocational context, it is essential that carers understand how children can be effected by choices made during pregnancy and the basic needs of children, for growth and development.

What new **KNOWLEDGE** will I gain?

You will learn about the development of the embryo and foetus, the different reasons for complications during pregnancy and the effects of lifestyle choices during pregnancy.

How does this build on the **SKILLS** I already have?

This will build on the exam technique that you learned in KS3 subjects, you will learn to increase pace and detail and use your planning time to add depth to your answers.

What new **SKILLS** will I develop?

You will learn how to identify the command word in an exam question and use your understanding of these words to construct your response. You will build a glossary of key words.

How does this build on the **KNOWLEDGE** I already have?

This will build on the work you did in KS3 Science on the male and female reproductive systems and conception. You will also build upon the work that you did in PD, about contraception and STI's.
