

Y8 Computing: Learning Journey

What are we learning about?

In this unit of work you are going to learn about animation firstly using power point and then serif draw plus. So you will create two pieces of animated work.

Why are we learning about it?

You are learning about animation as it is a very popular way to make adverts and film. This makes it a useful skill for you to have going forward in with your computing course and possible future careers.

What new **KNOWLEDGE** will I gain?

You will gain knowledge about how to use power point and serif draw plus to create animated pieces of work using images, text, stop frame, and layers. You will learn how to create an animations to some required specifications of a client.

UNIT: Animation

How does this build on the **SKILLS** I already have?

You already have some skills in using serif software from the safety and security unit and movie making in Year 7. This unit will build on this as you create, edit and export your animations.

What new **SKILLS** will I develop?

You will develop new skills as you learn more advanced features of power point that you may not have used before. You are also learning how to use serif draw plus which involves many new skills.

How does this build on the **KNOWLEDGE** I already have?

This unit will build on knowledge you already have from previous computing units such as, movie making and the computer. It also expands on your knowledge of power point due to using advanced features.
