

C2 LAB: Demonstrate Care Values and Review Own Practise

What are we learning about?
The 7 care values that should be followed by all Health and Social Care practitioners and how to demonstrate these in practise.

Why are we learning about it?
This is the final assignment of the course, which asks pupils to carry out a role play to demonstrate the care values and then discuss with their manager, how to move forward. In a vocational setting, these are essential skills to have.

What new **KNOWLEDGE** will I gain?
You will learn what the 7 care values are and how to demonstrate these in a positive manner and evaluate your own practise.

How does this build on the **SKILLS** I already have?
This will build upon the work you have done in previous assignments, you will use the grading criteria to ensure you gain the best possible grade.

What new **SKILLS** will I develop?
You will learn how to embed the 7 care values in your everyday practise, you will also learn how to evaluate your won practise and accept support from colleagues.

How does this build on the **KNOWLEDGE** I already have?
This builds on the work we did in LAA about supporting individuals to cope with life events.
