Y9 Computing: Learning Journey

What are we learning about?
In this final unit of year 9 we will be learning about how to combine two or more assets to create one graphic. We will also be revisiting all the units from KS3 to create an impressive portfolio of work

Why are we learning about it?
We are learning about how to use digital graphics as they are a part of everyday life and being able to edit and create a digital graphic is a useful skill.

What new KNOWLEDGE will I gain?
You will gain new knowledge of how to use graphic editing software called Serif Photo plus.

UNIT: Graphics and Project

How does this build on the SKILLS I already have?
Skills you already have will be built upon as you learn how to use many new software features. You will also build on your project skills when creating a portfolio of work.

What new SKILLS will I develop?
You will develop new skills in using layers to add images, text and colour to one graphic. You will learn how to cut out images and remove any blemishes. You will be using tools new to you in Serif Photo plus.

How does this build on the KNOWLEDGE I already have?
This directly builds on the knowledge you already have using Serif software and you will have edited assets in previous units such as animation or photoshop
