

TOPIC: LO2: Understand the benefits of learning through play

What are we learning about?

The different types of play and the benefits to children.

Why are we learning about it?

Play is an essential part of children's development and forms the main part of any EYFS classroom. All carers must be clear in how to structure and observe play. This piece of coursework will be in the form of a power point for staff at a nursery.

What new **KNOWLEDGE** will I gain?

You will learn how each type of play benefits children in their social, intellectual, physical and creative development. You will learn how each type of play can be extended and how each skill is essential for development later in life.

How does this build on the **SKILLS** I already have?

You will build on research and summarizing from previous coursework, you will need to ensure your selected info is clear and concise, to present to EYFS staff.

What new **SKILLS** will I develop?

You will develop your presentation skills, by creating a power point with notes, to be presented at a training event. You will develop your research and summarizing skills.

How does this build on the **KNOWLEDGE** I already have?

In RO20 LO1 you learned about the different milestones for SIP development. We will build upon his, by showing which activities are suitable for different ages and stages and how to use play to encourage development to the next stage.
