

## Art Y10 Spring HT1: Learning Journey

### What are we learning about?

Continuing using the topic of 'Identity,' in this unit of work, we are going to learn about developing our own work from initial ideas & inspiration from other Artists/craftspeople through to plans for our own personal final outcome/s on the theme of Identity.

### Why are we learning about it?

It is important as developing artists, that we learn how to develop our experimental and analytical skills through testing/trialing work and reflecting. This not only develops our skills, but allows us to choose how our final piece/s will look more effectively.

### What new KNOWLEDGE will I gain?

We will gain knowledge in idea development processes.

## TOPIC: IDENTITY

### How does this build on the SKILLS I already have?

You will be encouraged and directed to refine your skills and work at a technically more proficient level than when you have used the various different media's before.

Through more regular classroom practice and knowledge of the various medias, you should be able to produce more thoughtful and accomplished outcomes.(AO4)

### What new SKILLS will I develop?

- Continue to develop skills in reflection through annotation and analysis.
- You will learn the process of testing and evaluating media and techniques, which is necessary for improving your work.(AO2/3)

### How does this build on the KNOWLEDGE I already have?

You are already used to evaluating and assessing your work throughout KS3 projects but usually just a single focused strand. Now you will be asked to look a multiple factors in your work such as considering media & techniques /composition/ relevance to prior investigations and research and links to your chosen Artists/Craftspeople..
