

RO20 LO1 – Understand the Social, Intellectual and Physical Developmental Norms from Birth to Five Years

What are we learning about?

We are learning about the expected developmental norms for children aged birth to five years old, in physical, intellectual and social development.

Why are we learning about it?

In a vocational context, anyone who works with children needs a good understanding of how they develop, so that they can plan effective activities to encourage development.

What new **KNOWLEDGE** will I gain?

You will learn how each area of development is split into different sub-sections of development. You will learn how a child is expected to develop in these areas.

How does this build on the **SKILLS** I already have?

This builds on our research skills that we used for parts of RO19

What new **SKILLS** will I develop?

You will learn how to research using several websites and reference your sources. You will learn how to order your findings and expand your information.

How does this build on the **KNOWLEDGE** I already have?

This builds on the knowledge gained in RO18 LO3 when we learned about the developmental needs of the child, linked to play and behaviour.
