

# Y7 Geography HT 5 : Learning Journey

## What are we learning about?

In this unit of work we are going to learn about global populations; why some countries have lots of people, and why some have very few.

## Why are we learning about it?

We are population! This unit helps us understand the world we live in, and why some parts are more crowded than others.

## What new KNOWLEDGE will I gain?

You will learn key terms such as birth rate, death rate, natural increase and distribution. You will also learn how migration works and the positives and negatives of migration.

## TOPIC: Population

## How does this build on the SKILLS I already have?

You can already read a variety of maps and graphs. You are able to recall key terms and their meanings.

## What new SKILLS will I develop?

You will develop your ability to apply key terms and concepts. You will use different types of maps and graphs, including choropleth maps, and population pyramids.

## How does this build on the KNOWLEDGE I already have?

In unit one you learned about maps and the location of cities in this UK. This is where there are large centres of population. You are also familiar with the terms social, economic and environmental, which will be applied in this unit.
