

## Y7 Geography HT 4: Learning Journey

### What are we learning about?

In this unit of work we are going to look at climate change, and the impact this has on weather.

### Why are we learning about it?

Climate Change is a “hot topic”, and controlling it is vital. By understanding what it is, what causes it, and how we stop it, we can be better prepared for a more sustainable future.

### What new KNOWLEDGE will I gain?

You will learn the meanings of key terms such as climate change, cause, effect and solution.  
You will learn how what tropical storms are, where they form, and why they're becoming more common

## **TOPIC: Extreme Weather and Climate Change**

### How does this build on the SKILLS I already have?

You can already read weather pressure charts of the UK, and you will build on this in a global context.

You can already work with others who have similar opinions, and you can discuss your ideas with them.

### What new SKILLS will I develop?

You will develop your ability to read weather reports, and forecast the weather based on pressure charts.

You will be able to explain how to use weather recording equipment.

You will develop the ability to work with others, and give an opposing view.

### How does this build on the KNOWLEDGE I already have?

You will build on your knowledge of place from unit one, and will be able to use your understanding of social, economic and environmental when learning about the effects of climate change, and tropical storms.
