

RAS: Year 11 Spring Learning Journey 1: How does religion affect the world today?

What are we learning about?

We are going to consider how religion (predominantly Christianity & Islam) affects life today. We'll track the changing impact over time to see how in 2023, art and architecture, medicine and freedom can be affected by religion.

Why are we learning about it?

Too often people say 'I'm not religious, I don't need to know that.' It is so important to see how religion can have a lasting impact on society, even in Britain where now only 46% of people say they are Christian, and consider the wider world.

What new KNOWLEDGE will I gain?

- Religion's impact on art and architecture, focused on the UK and Southern Spain;
- Christianity & Islam's impact on medicine over time;
- How religion can affect freedom

Careers

How does this build on the SKILLS I already have?

You demonstrated enquiring minds when considering the impact of anti-social behaviour, and also the importance of payslips, in Y11 RAS. You also demonstrated enquiring minds when studying the government in Y10 RAS.

What new SKILLS will I develop?

We'll be focused on enquiring minds in this unit. This is because we need to show a willingness to engage in something beyond our 'day to day' normal. You'll be helped in this by considering two contrasting case studies per lesson.

How does this build on the KNOWLEDGE I already have?

You all studied RS at Key Stage 3, and then did Core RS in RAS last year looking at Israel-Palestine and religious beliefs. In this, you reviewed Christianity & Islam.

For GCSE RS students, it'll build on your core knowledge of religion.
